

Safe and Effective Local Anesthesia: Lecture CE Course – 4 CEUs

What you need to know for Accurate, Safe, Effective Local Anesthesia. Presenter: Debra November-Rider, RDH, MSDH

Do you know why when you give an IANB, you do not achieve complete anesthesia or anesthesia at all? What is the safest local anesthetic for your pregnant patient, cardiac patient or a patient with liver disease? What new advances are there in local anesthesia? This presentation will address how to ensure the safest anesthetic for your patient, and how to troubleshoot and improve your injection techniques. A review of how to calculate the MRD to prevent toxicity will be covered including other risk management principles for safe local anesthesia administration. **Lecture class only; no clinical component. Open to any dental professional. 4 CEUs awarded upon completion. Objectives:**

1. Identify critical anatomical landmarks for various maxillary and mandibular nerve block injections.
2. Assess causes for inadequate local anesthesia and make recommendations for improvement.
3. Implement strategies to troubleshoot inadequate or absence of local anesthesia.
4. Calculate the maximum recommended dose (MRD) based on the patient's weight and medical status.
5. Determine factors to consider when formulating a safe treatment plan for local anesthesia.
6. Describe the most recent advances in pain control.

Course Date: 9a – 1p • Saturday, April 4, 2020

Enrollment: Call 1-800-818-3434 December 2 – March 20

Course Number: HLT 744-30. Please provide a valid email and phone number

**Middlesex Community College • Bedford MA campus • 591 Springs Road
Room TBA**

Tuition: \$89. 4 CEUs awarded upon completion

Course Questions: Please call 781-280-3570 or e-mail wrighte@middlesex.mass.edu

Local Anesthesia Refresher Clinical and Lecture

Local Anesthesia Refresher Course: Hands-On Review

If you are a RDH with a state license to administer local anesthesia and would like to have faculty oversee your technique, this class is for you. We will review maxillary and mandibular nerve blocks. Specific injection techniques will be determined by participants. The goal of this course is to become more comfortable with injection techniques that you have already learned, or to troubleshoot any barriers you have encountered. This course will include four hours clinical practice and a two hour lecture.

Required Forms: In order to participate you must have your state permit license to administer local anesthesia sit as a patient for this hands-on course. Note: If you have passed a local anesthesia course between May 2018 – present, you may enroll with proof of certification course. **Please enroll and submit the following forms/copies:** current/valid RDH license, CPR certification, Permit L or state license to administer Local Anesthesia, medical history forms and consent form. MCC's memo of understanding is not required for this course. (6 hours, 10 CEUs). \$339
