COURSE DESCRIPTION:

This course will provide an overview of medical and recreational marijuana use, its pharmacological effects on the body, medicinal applications, and dental treatment considerations. Legal and social issues surrounding marijuana use will be discussed.

Course Objectives:

Upon completion, the participant shall be able to:

- Describe medical and recreational marijuana use, and modes of administration
- Describe and identify the effects marijuana has on the body
- Discuss various medicinal applications of marijuana
- Evaluate the patient who is using marijuana and determine treatment considerations and modifications
- Converse with the patient who is using marijuana in a way that is conducive to creating a positive provider/patient relationship

INSTRUCTOR: Kate Soal, RDH, MSDH is an associate professor of dental hygiene at Quinsigamond Community College and adjunct faculty at Mount Wachusett Community College.
