

Safe and Effective Local Anesthesia: Remote Online Live Lecture CE Course - 4CEUs

Live
Online

What you need to know for Accurate, Safe, Effective Local Anesthesia.

Presenter: Debra November-Rider, RDH, MSDH

Do you know why when you give an IANB, you do not achieve complete anesthesia or anesthesia at all? What is the safest local anesthetic for your pregnant patient, cardiac patient or a patient with liver disease? What new advances are there in local anesthesia? This presentation will address how to ensure the safest anesthetic for your patient, and how to troubleshoot and improve your injection techniques. A review of how to calculate the MRD to prevent toxicity will be covered including other risk management principles for safe local anesthesia administration.

Live OnLine via Zoom. Lecture class only; no clinical component.

Open to any dental professional. 4 CEUs awarded upon completion.
Students must be present the entire 4 hour webinar to be awarded CEUs.

Objectives:

1. Identify critical anatomical landmarks for various maxillary and mandibular nerve block injections.
2. Assess causes for inadequate local anesthesia and make recommendations for improvement.
3. Implement strategies to troubleshoot inadequate or absence of local anesthesia.
4. Calculate the maximum recommended dose (MRD) based on the patient's weight and medical status.
5. Determine factors to consider when formulating a safe treatment plan for local anesthesia.
6. Describe the most recent advances in pain control.

Course Date: Saturday June 4, 2022 at 9AM-1PM Course HLT 744 75

Enrollment Deadline: May 23 or until seats fill
